

ABOUT US

Lola - Projektovanje i mašinogradnja d.o.o. is a leading Serbian company in the field of metallurgy and heavy duty mechanical engineering.

Reliability, quality, professionalism and continuous implementation of the latest technologies are the basic principles of work in our company.

The company was founded in 1948 as a part of the Ivo Lola Ribar corporation. In 2007, following the change in ownership structure, Lola became a part of the Dam-Mont group.

Thanks to the radical changes in management, organization structure, quality management and introduction of the latest production technologies, a profitable and modern business was created. Today Lola has 260 employees and 60.000 m² of the workshop floor.

Lola - Projektovanje i mašinogradnja doo is equipped with a large machine park, which enables a wide range of highly sophisticated production programs, consisting of processes such as cutting, rolling, bending, welding, high precision machining, assembly and installation.
