

QUALITY

Spectrometer SPECTROMAXX F

Laboratory for mechanical testing

In order to satisfy the needs of its customers, Lola - Projektovanje i mašinogradnja doo continuously improves its quality standards. We achieve the highest level of quality of our products and services, thanks to:

- Using only raw-materials with the certified quality standards acceptable worldwide;
- Highly qualified workforce that has a proven record of the relevant experience from executing projects on power plants, oil refineries, chemical plants, oil platforms, etc.
- A modern production process.

Within the company, there is a quality department led by the quality manager. For many years, company has had its own laboratories for mechanical and chemical testing.

Until now we obtained the following certificates:

- EN ISO 9001:2008
- EN ISO 14001:2005

- EN 1090-2 EXC3:2008
- EN ISO 3834-2:2005

The certificates are available for [download](#) here.
