

METALLURGY

This program includes equipment and machinery for non-ferrous metallurgy: the electrolysis plants, smelters and refining facilities; equipment and machinery for ferrous metallurgy - production of gray iron and steel and their processing by rolling or similar. Lola Pom produces the following metallurgy equipment and machinery:

1. Preparation and ore agglomeration plants;
2. Steel mills;
3. Hot rolling mills for profiles, sheet and wire;
4. Cold rolling mills for steel sheet;
5. Pickled sheet device;
6. Rolling mills for non-ferrous metal production of aluminum sheets and non-ferrous wire;
7. Plant for lead, silver and zinc refinery;
8. Lines for wire coiling, NK and NB type;
9. Reducing mills for shaping of seam pipes and profiles;
10. Jointed shafts for high torque transfer.
