

## INDUSTRIAL CRANES

In the area of industrial transportation, the Lola`s production program includes various types of cranes, conveyors, transporters, etc.

Lola - Projektovanje i mašinogradnja designs, manufactures and installs all types of bridge, portal and semi-portal cranes, manual and electric-powered, as well as remote controlled lifting cranes. In addition to large capacity and high level of safety, the cranes are characterized by excellent accuracy and load positioning.

The cranes are completely manufactured in our own modernly equipped workshops, starting from welding process, machining, heat treatment and laboratory testing.

Cranes are designed in our own design office according to the latest technical solutions and standards.

Types of products:

1. Electrical overhead travelling cranes with rotary traverse and magnet:

- 2 -125 t capacity
- span up to 32 m.
- span up to 32 m.

2. Suspended electrical overhead travelling cranes:

- 2 t, 3.2 t, 5 t and 10 t capacity
- span up to 2 x 30 m.

3. Shelf storage cranes:

- 0,5 - 5 t capacity
- span up to 26 m.
- 3,2 t - 20 t carrying capacity
- span up to 32 m.

4. Portal cranes:

- 10 t - 500 t capacity
- span up to 45 m.
- span up to 2 x 30 m.
